COMPONENTS

Mounting Base

Trim Tool

L-key

01

Using the L-key provided, slightly loosen the screw to ensure the rear plate moves.

Do not fully remove the screw - keep about one thread engaged.

02

Insert the trim tool into the seam between the screen and side bezel to the depth shown, to create a gap.

03

Hook the mounting base rear plate in the rear bezel seam (01) and position the front plate in the front bezel seam (02).

04

For best results, slowly slide mounting base down until it's about 1/2" above adjustment knob.

Remove trim tool.

Tighten screw until base has a snug fit around screen bezel.

POSITIONING

Mounting base is designed to fit the driver's side of the screen bezel as shown.

WARNINGS

- Do not mount accessories in front of or near the path of airbag deployment.
- Check vehicle compatibility before install to avoid damage to the vehicle mount point.
- Designed to work with OEM dashboard only, not compatible with aftermarket modifications.
- Do not use with 3rd party extension arms. Adhere to our phone weight limits.
- Mount electronics away from airflow to prevent heat damage.

Self-installation instructions and advice are provided for your convenience. It is your responsibility to determine if you have the knowledge, skills, and physical ability required to properly perform an installation. Offroam shall have no liability for damage or injury resulting from the installation or use of any Offroam or third party products. It is your responsibility to ensure that all products are installed in adherence with local laws and regulations and in such a manner as to allow a vehicle to be operated safely and without distraction. Offroam product warranties do not cover the installation, removal or re-installation of any product.
